It will take place in Aldeia do Sol, Mortáguia, the first annual Mobile Robotics Laboratory Workshop on 29-30 March.

The first day will be focused on the strategic research areas to the laboratory in the near future and on the scientific work that is being developed at the Laboratory by PhD students.

The second day will be focused on team building.

During the event the participants will have the opportunity to share, to create and develop synergies inside the team, to reinforce the team spirit and to improve the future results, keeping in mind the idea that: "The whole is more than the sum of its parts".
