

MICAEL COUCEIRO mostrou robôs que poderão ser usados para encontrar vítimas de catástrofes

Motivating young people to enter a career in industry is linked to the objectives of the project "Pense Indústria" which is being presented this week at Alves Martins high school (in Viseu).

This event had CTCV as the official partner with the active participation of ISEC / RoboCorp and MRL-ISR in which Micael Couceiro (doctoral student at FCTUC) and Carlos Figueiredo (researcher at ISEC) presented several works on robotics.
